Bloomsbury School District – Asbestos Notification Compliance

Dear Parents, Guardians, Staff, Students, and Members of the General Public,

Each year, the Bloomsbury School District is required by the Asbestos Hazard Emergency Response Act (AHERA) to notify our building's occupants about the Asbestos Containing Building Materials (ACBM) in the building. Information pertaining to that notification is detailed below.

To assure that Bloomsbury School is safe and in compliance with the requirements of AHERA, the district has retained the services of Rullo and Gleeson Associates, Inc. Maurice Jullet, the president of the outfit, has been certified by Robert Wood Johnson University Hospital in New Brunswick, New Jersey to inspect the building for ACBM and develop a plan for the management of these materials. The Management Plan for the Bloomsbury School District documents to location and condition of asbestos and presents a plan of action for removal and/or maintenance of these materials.

The Bloomsbury School District has a copy of the Management Plan and it is available for your inspection in the head custodian's office. Every six months, all potential areas are inspected for possible deterioration. If any deterioration is found, the area is repaired and cleaned by trained and certified personnel.

Asbestos remediation and maintenance is conducted within the guidelines of Asbestos Containing Materials in Schools: Final Rule and Notice (40 CFR Part 763). Specific details about asbestos removal activities will be announced ten days prior to the start of any such project. Tests will be taken of the air quality during and after each removal project.

If you have any questions, please feel to contact the school.

Respectfully,

Steven Weber
Facilities Supervisor
