September 13, 2010

Dear Parents

Your child xxxx has been identified for enrollment in the Basic Skills Improvement Plan for the 2010-2011 school year. Student identification is based on performance on standardized tests and/or teacher recommendation. This program provides direct instruction in basic skills areas identified as in need. Instruction is provided in Language Arts (reading/writing) and Mathematics as additional support to your child's regular classroom instruction. Basic Skills instruction does not replace classroom instruction, rather it supports it with additional instructional time in the area of need.

I will be providing BSI in the afternoon. Your child will be receiving direct supplemental instruction for Language Arts and/or Mathematics. Please contact me with any questions or concerns.

Sincerely,

Michele Duerring
Bloomsbury School District
